TR.3 GRANT SIVEN AND 19 —Joseph W Dravel declares that the fund collected by George Jones for the Grant family is not look, unless the Grant family is not look, unless the Grant family is wit may to so consider it. The laws of New York privide that thus fun is shall be invested in detain standard securities, and these securities are named in the statutes. Any in vestment outside of this tange named in the law is at the risk of the trustees. If the trust fund cannot be callested back out of the Walsash property, the Grant family can recover the money by a suit against the Jones-Morgan satisfand the third trustes. There as no doubt at all of their liability for the entire amount. There is no point in the objection to bring suit against the principal individual who was metrumental in mising the found flowever meritorious his act is, he collected the money of object people for tent, Grant, and his investment of that money, is one for which he should be attestly lable. Congress will undoubtedly give Mrs. Grant the same pension it gives Mrs. Grarield, and with good business management kins from should have property of at least half a million outside of this congressional pension. There are no good financial reins of her the shand to act a trustee of her property and it that way sie would always have a good from the Armites William Door.

Letter to Philadelphia Prisis,
Levin, July 80
"It's something like a fullilling the prophecies
when all the first families get all the best offices."
It is nearly half a century ago since John
Bright quoted the above couplet of Hossa Blgflow. He was referring to the patronage which
the aristocracy of Great Britain have cause to

be lealously sounded and preserved. A few

the aristocracy of Great Britain have cause to regard as their right, and a right which must be jealously guarded and preserved. A few years earlier the same statesman had delivered himself of the following pregnant sentence "The more you examine this matter, the more you will come to the conclusion which I have arrived at that this is neither more nor less that a gigantic system of cutdoor relief for the aristocracy of Great Britain." But despite the thuncering of Bright, the "first fam lies" have continued to fatten you the people, and since the year 1850—to go back further is not necessary—dokes, marquises, earls and their relatives and frends have in some way or other drawn public money amounting to be less a sum than \$643,67,160.

Rank is much sought after by the parvenus of this great city, and I could came more than one millionaire who has lent the Prince of Wales ready cash in the hope of being regaid some day with the gift of a title. Runk brings bowing and scrapinz, in which small named delig it, but there is ano her advantage it has a bestow. The Speciator, defending the aristocracy, a short while since wrote. "But mar know that rath will be a distinct advantage to their sons, and will, in some deadedly more rapid. Their services are never overlooked." In proof of this statement the figures I append are significant. To twenty-eight families of these, amphering 199 relatives who have held 1913 offices during the last thirty-five years, the large sum of \$45,000,000 has been paid Marquises, representing 35 families and having 620 relatives monepolizing 1525 effices, have drawn something over \$41,000,000 during the same period.

Westington Letter to Donver News
That this city is the most appropriate place
for Gen. Canan's tomb is true ecouch, but, at
the same time, the loud vectoration of the Washingto a people on the subject is sheer impudence: Their anguish is parely that of a disappointed boarding-house. They will miss the crowds that would be consequent on the crowds, and the it the basis of their collective wos. and the is the basis of their collective woo, Nowhere in the country is there less of the national aprit than in Washington. It is a city of office-helders and beadles. It lives off of the chance of its location. It is a pensioner in national putriotism. It is a Niagara halls backman dopending for its bread and buffer upon what it has to show, and with to sympathy with the spirit of that which it shows. In all this large city, which is sending up its lowl for vanished ducats, I have not seen as houses drapsed in memory of tren trant, although of all presidents he did the most for

The cry against the failure to bring Grant's remains here is simply the anguish of a showman disappointed in obtaining an especially attractive cur osity. The real, Washingtoman never admired trant. He tollerate him while he was it power because he would tolerate agreement of an body when there was a crance of profit. One may move among this people native his career than anywhere else. You have no idea of the number of snakes amount y kiled by the mowing muchane until you tall with different farmers on the subject. In former days bits of snake would be continually failing from forks full of newly cursed grass, or from the hay in the stack or mow during the winter, when it was being fed. The mowing magahrne is peculiarly fatal to them In their acc, edited windom, they do not start to run away until the evidence of danger is upon them. Then they raise their heads just high enough to reach above the blades, when they are decaptated quecker than an active partisan under civil service nonsense, and the change is so sudcen that the body of the snake doubtless springs high enough to again meet the blades.

OLD BANK NOTES.

How they are Redeemed and Disposed of,

One of the Remarkable Sights in the Treasury Depariment-Lightning Corrency Counters How Coursed Rotes are Identified.

Washington Letter.

When the national bank notes have tramped about the country until they have become ragged and sagabond and have reached the lowest depths of degradation, they are bundled up and sent to the treasury department for redemption. Many millions of these vagrants are received at the department each year. They have to pass for review through the national bank redemption agency, where those that are utterly deprayed and good for nothing are sentenced to be chewed up, and those that have not in demption againcy, where those that are nuterly deprayed and good for nothing are sentenced to be chewed up, and those that have got in through the force of association, but are still not so far gone that some good may not be got out of them, are sent back into the service. In the placy of close that are condemned, moe, new nodes, cripp and clean, are sent out. The expensive of these notes is varied, and in some cases very novel and interesting, but their tale is told only by their ragged and dirty appearance when they get back to the department. The average longth of time that a new note can keep up a respectable appearance is about three years. Some have been found at the end of twenty bears to be as crisp as on the day of their issue, but these are examptional cases, where they have fullent into the hands of people who made perts of them and carefully guarded them from rough usage. The wandering note soon becomes a tramp. It rapidly goes to pieces if, it starts out for the West, stopping along at their counts at tramp. It rapidly goes to pieces if, it starts out for the West, stopping along at their counts of the first wandering saloons and falls it with low company. But had been ween it falls in with low company had babathe tell on a bank note very quickly. It is hard lock when it falls in with a bloody-fingered butther. Some hays been known to become good for-nothing under such circumstances in a few weeks. They are subject, too, to all coffs of misfortine by fire and water.

INDENTIFYING NOTES BURNED TO A CRISP

stances in a few weeks. They are subject too, to all sorts of misfortune by fire and water INDERTH VIND NOTES BERRED TO A CHEST Many thousand get burned up. Then their charred and bit ckeened remains are sent to the treasury for redeemption. One lady in the controller's office it this case has charge of them, and they are sent to her for indentification herfore they can be redeemed. Her name is Fitzgerald, and she is said to be very expert, seldom failing to indentify a note, giving its proper name, date and classification, no matter how body burnt it is. Sometimes packages of seward hundred; done up to be expressed, are sen in all stuck/ogeths and humed clear through to a black cristy mass. She then separates them one by one will a very thin-bladed knife, and places the charted remains of each one separately with a magnifying glass. She is familiar with all peculiarities of the issues of the various tanks and a note must be reduced almost to ashes to be beyond har recognition, though it an insuperience doe it might not be distinguished from a plece of grocer's paper that had gone through the fire. All those beese otherwise multiated go [directly to the relemption agency. The degree of expert efficiency displayed there is something remarkable. Thus branch of the service was organized about sleven years ago by feen Spinner. Prior to had there was no systematic redemption of the paper currency as it became too wornfor circulation, and a good man, ragamuffin quete were wandering about the country. The service began with about 152 people employed in containing and a sporting the notes that came in for redemption, Very nearly the same automit of work is now done by fifty-sever. The counting in and assorting of the footes requires great care, and it is early lifer long experience that it can be done randylly There is an average of about 152.000,000 notes per year handled, and they have to be counted about five times if there is no in cl. in the count, and oftener if any mistakes are made but the amount is variable fr

the force of fifty-even, all except two or tree of whom are ladies, can hadde just half a million notes each day. This is very expert counting? The notes when they first come to be million notes each day. This is very expert counting if the notes when they first come to be a diged have first to be "counted in." This requires the "counted in." This requires the "counter in." to go over them twos, and she frust make no mistake and pass no conterfect or the loss thus caused will be deducted from her salar. She agiven from six to ten the said notes, for which she gives a receipt then she counts them in then she counts term lack, and if the two counts agree she is given credit for hem when she sattles up in the seeing, turbing in the intonsy bound and latelled with her name and amount on each puckage. If the partiages, or any of them, are founds sort she has to make good the deficiency. Next, the notes have to be assorted, those in good condition from those in bad condition then have a to be grouped as to denomination, then they have to be grouped as to denomination, then they have to be grouped as to denomination, then they have to be grouped as the denomination, then they have to be grouped as the denomination, then they have to be grouped as the denomination, then they have to be grouped as the denomination, then they have to be grouped as the enough of the denomination, then they have to be grouped as the enough of the denomination of the said the "counter" out? This is provided they and must be more expert. The counter-out handles from 5000 to 21,000 per day, while the counter-out handles from 5000 to 21,000 per day. This is provided they make no mistakes, which makes a recount necessary and doubles the work. To be this constant attention. makes a recount necessary and doubles the york. To lo this requires constant attention and as a free awarn on the nerves, as each note has to be scrutiarzed very closely to see that it is not competeted, and the "counter-in" must know the name of every bank that has a counterfeit prior it, and have in his nimid a full description of the fulse note so as to be able to delect it; at sight. The superintendent says counterfeit notes are thrown out by these experts without hesitation every time they come to them.

AS ADDRESS TO WOOL GROWERS.

To the wool growers of the United States— It is now appa ent that a determined effort to revise the tanif laws of the United States will te made at the next session of congress. It is understood that the object of those who will aske this effort is a large reduction of revenue, with an aband ament of the principle of protection, but with such incidental protection as can be given to those industries and pursuits that obtain the attention and favor of congress The theory that all raw materna should be on the free list now urged by some who in disguise are for free trade, and the neglect to adequately are for free trade, and the neglect to adequately protect product, as of wool, which has attended all past economic legislation, affords reason for probund apprehension by those who represen this unportant agricultural pursout. In order to keep such persons luformed as to pattern affecting their interests, land to chable them hereafter to act harmonions-plamony themselves and unitedly with other industries that agree with their views. I desire to obtain the name and postoffice addresses of each officer of all state and county wont growing associations, and also the names and postoffice addresses of wool growers in each state who desire information on this subject. The object being to distribute, from time to time among such persons, information calculated to keep weel growers informed as to the progress of all efforts affecting their interests.

some Notes about Mr bhilisbr, the Pioner of American New paper Hamorius—How he Takes life

hir Shillaber is the pioneer of American pewspaper wits, says the Boston correspondent of the New York Iriban. When he started the Mrs I sathington papers he had the field to himself. Shillaber opened a career for Rhese now indispensable adjunts of journalism, and his first Partingtoning spirit was greeted with laughter throughout the county, and it created a demand for more. The faune of Mrs. Partington was, in a sense, accelent it Shillaber never premeditated any such resilt, and his first Partington mans was merels, a through fancy. It came to light somewhere in 1813. He had just been appointed for all reporter of the Boston Post, and in that capacity on the very first day of his service, and in the very first "copy" he wrote in The Hub, he penned the words that made him famous. He had long been delighted with bydney Smith's description of a Mrs. Parting ton vanily morphing tack the Atlantic occ., and on the day of his entrance upon repertornal duties he chromicled in this fashion at residential that morning. "Mrs. Partington says that the price of breat may have advanced, but that end never the parts of that fathers."

that mounting "Mrs Partington says that I am price of breast may have advanced, but that said never tays more than firty cents for half a dillar s worth." This was copied for and with in all the newspapers of the country. Shiftal erhad written it with no idea of the result, and only as a bit of padding to fill out his column. Its reception surprised and pleased him, and thereafter he wrote desultory sayings of the kind upon the topics of the day, and presently he kept up a running fire of them. Mrs. Partiagion was quoted everywhere the circulation of the Post increased (of Greenes, the popictor, wrote up from the country "Who the sence as Mrs Partington." But the identity of the good lady was conceated for some time. But Shillaber's reputation and labor never hought him riches. Journalists then, as mow, worked harder and were path less than mean in any other profession. And Mrs. Partingfon could receive from Shillaber little of the allention sie disserted. He was the only local them up on the Post. When the editor was away he wrote the "copy," put it in type, printed he cheets and delivered the prices to the subscribers. When he came to Boston be worked for several weeks as typesetter on the Post, utility the locky day when he was made reporter and introduced his Mrs. Partington to the world. Mr 'shillaier retired from active journalism in 1870. His cld oger, rheematism, was steadly getting the better of him. But to has never entirely severed his connection with the press, and he is now sending weekly letters to the Harifford Post, over the signature of "The bild Main with the tane". Shillaber's spirits are as tody cheerful and sanguine, auch be will not allow hunself to think of his crip pled state as a border. Though unprisoned in his the sea by me, he keeps thoroughly posted in the affairs of life.

THE WHINE'S ISSUE IN OHIO.

Some Siriking Statistics of the Operation of the Scott Law CINCINNATI, Aug 11 -The discussion which is going on between the leaders of the prohibi-tion party and the leading republicans as to the best means of mitigating the evils of intemper-ance, have resulted in the publication to-day of statistics which show that during the brief pe-

statistics which show that during the brief period the Scott law (levying a special tax of \$200 a year on retail liquor disalers) was in force the number of salcons in the state was reduced about 50 per cent. At the time the scott law went into force there were in the state according to the internal revenue reports, 15,735 places where liquer was sold by the drink. Nix months later the number had dropped down to 10,831. About that time—the fall of 1885—the state went democratic through the diversion of a large number of regulational votes to the prohibition ticket. It was understood that the levisiture the elected would dropped down to 10,831. About that time—the fail of 1885—the stale went democratic through the diversion of a large number of republican votes to the prohibition ticket. It was understood that the legislature then elected would repeal the Scott law, and through the intuence of that expediation the number of saloons legan to increase. Empers of small graggeries who were about to go out of the bisiness forrowed money to pry their tax and kept on, while others started up afresh. What the legis inture old was to reput the law and re-enact if the same day with the local option feature wholly omitted and other features changed and weak no! It its new form the law was found to be unconstitutional by the supreme court. The consequence was that in April of this year the number of saloons had increased to 14,921. There are strong lemperance men who were inclined to support the prohibition licks, who have said to-day that they are much impressed by these figures and are now disposed to act with the republicans. Phough remains, however, of those so blindly attached to the prohibition party that no reasoning causes them to doubt the result in the coming causes them to doubt the result in the coming causes them to doubt the result in the coming causes them to doubt the result in the coming causes them to doubt the result in the coming causes them to doubt the result in the coming a careful ticket, in making whisky free in Onlo for another two years.

fits of those who handle the products. A family wanting a cottage can't get it it a reasonable rent, because the owner says it won't pay anless he can get a rent sufficient to make a return of 10 per cent, at least on the cost of building plus the fictitious valuation of the lot. The consequence is that there are no cheap rents for small houses in Rortland. Let us so great a city as Chicago, within twenty minutes' ride of the intersection of Clark and Madison streets, there are thousands of cottages. PROBIBITION IN GEORGIA

In Georg a the prohibitionists are attempting o organize a distinct party, and the Atlanta Constitution, the leading paper of be state, puts in a double-leaded protest. That paper has strongly supported prohibition through local option, a method by which prohibition through lead option, a method by which prohibition has been voted it three-fourths of the countries. of Georgia Intil protesta against the crand zation of a political party upon the free dast it can be enforced by state authority in the re-mainder of the counties where the chies and large towns are situated, and where there is no sentiment to support it. The democal of the prohibitionists, now in that a state law stall be exacted to force prohibition upon the conflict that in we return to yote for it. It this time is forced, the Caputa than says, the hold of the democratic party in the state will be shaken and 'mything hat threatens to distinct in-democrats and in it the balance of power in the hands of repullicans and negross is to to de-

As republicans we should be gird to see the As reported with the strength of the line democratic parts in Georgia drilled and besten this cumod lend us to wish the result to come about upon a misteading issue. There would be nothing practical nor permanent in it, and the on me of temperance reform, uslead of being advanced, would, as we view the mut-

ter, certainly be set back by it.

The Allanta paper looks at the question in this same light, 'or though it express, concern about the effect of the third party no ement upon the fortudes of the democratic party, it professes far more solicitate about the effect upon the cause of temperance itself. A news that it has alreade supported probiblion when it was not mixed with politics, and as a prohibition pape. It deprecates the consequences of

As a political subterfurgs it becomes editions, suspected and contemporary of the St. John cam pagg proves this, if it had not been reveal a company proves this, if it had not been reveal to the ready by a dozen other examples. If he probabilitionists of Georgia have done not it work. They have won and deserted the admiration of the country. The glory of their work and the good that has to me from it are simply a special from the turning towns and village; it it were almost consume! Their work will be stead has as long as its original integry is main lained. It will be lost when it is diverted into the absorbing strain, of political integry. Of all men on carrit, who would at any hazard hold problibition and politics apart, the real semper sure men should be first. A union and might for the time of reaten the very exist-top of the problibitions.

Local option for the counties, the Constitution declares, is the only efficient method of problin-tion. Supplement this with a high becase law for the counties that will not have probabition, and you obtain all the restriction, which can be had through legislation The Constitutio i puts it in this way

NORTHERN PACIFIC MATTERS. vergans mest apply for the poor pitteres liney have from the government as a recognition of their patriolic devotion and services. But that is in Mr. Lamars department. Un tapplity, Mr. Lamar, was one of the instigators of the rehellion. Naturally, to his department there is an attempt to turn on, such relatives of the loyal dead as Miss Sweet of Chicago. But Limar is responsible, not Chevelani. Lamar is the one who wants partisanship in the public service, and rebel partisanship in the public service, and seem that notorious rebel honey, in spin et all objections, was sent to Inlig, and afterward was forced in inwilling Austria and when Jackson and othe unpartioned rebels were sent to other nouris and when Melere was sent as consulted Japan. All this was Mr. Hayard's work inhapping he was a man of southern birth and sympathes and he cann't lep it the was the work deviced article of the people. If Mr. (1) velund was so to prosent the to the lass uses of partis making the power cutrusted to him by the people for mis consulted purpose, let him do it. THE VIBGINIA CAMPAIGY

Boll System of Frauds Projected by the Bourbons-Hepoblicies Brack for an Aggressive campaign. Special to % 1 in Honcer 18.84 Washington, Aug. 11.—A gentlemann who has ust returned from an extended trip to VII ginia reports that 'be democrate are boldly declaring that they will use all the power lodged in their hands to insure the success of their candidate for governor. In conversation with democrats in litchi and the gentleman al luded to was informed by them that the election for governor would not kings upon the number of votes cast for the coming canditates. The democrats were in full possession of the election officers throughout he state and it was the purpose to use the election machinery to make Prixhugal Lee governor. Their mode of procedure will be to keep the colored people from the polls by various detices, and when these tail of the desired chiert, a resort will be had to changing the builders after the polls are closed. It is not likely, however, that the republicans, under ano leadership of Wiss, Mahone, Cameron, Highelsberger, Biarr, and ther shrewd leaders and brave men, will per not the make the objects to be defeated by such sold and experiments from as the democrate have in contemplation. The campa gu in the state will be-Inded to was informed by them that the election systematic fraud as the isomeerats have in on templation. The campa m in the state will begin heat weeke on host sides, and the republicans are determined to raske it both progressive and aggressive. They are convinced that the democrats will attempt to use the decision machinery to further the fraudulent-dee gus but republicans are encouraged by the fact that four years ago when the bourbone were in that four years ago when the bourbone were in that four years ago when the bourbone were in that present of the state and when they were stronger and better organized than in without candidate for governor, John W. Dan, ets, was heaten by Cameron, the present governor, and had a legisla ure was claven that sent Mahone and Riddloberger to the United States senate. and filddloberger to the United States senate At that time a targe number of reputhicans refused to co-operate with Mahone and Cameron, but now the readjusters are merged in one united party, and are up to confident that they will achieve a victory in November. In any crent, however the bon bons will not be permitted to disfranchise the colored voters, either to recibly excluding them from the pells or by fair pelling with their bullots after they have been east.

After the was on tyrra grow he started to walk up North Front street and met policeman Nash, to whom he told the story of the attack. He was aken to police headquarters, where he related the account as published above. The highwaymen secured seven \$5.0 gold pieces and \$5.00 km sizes. Which he had in a horselon larging arrived here yesterday afternoon from lugger, and had started to Albina to visit so in the distance to pay an eld board buil to the Key (ity hote). He was perfectly sober when he reached the jail, and said that he had not shown his money after his arrival here, and that he had not shown his money after his arrival here, and that he had not removed his purse from his pocket. Jaggy was a solder on the Union sets during the rebellion and is a member of the Grund Army of the Republic. There is no quisant hat he tells an entirely truthful story. Je probably owes his life to the fact that he ware pantalogns of very thick malerial and two heavy cotton shure. FROM CLATSOP BEACH

SEASTOF HOUSE, Aug. 18 Chastof House, Aug. 18
One hundred years ago this mouth, Classop beach was througed with the elite of he noble red race. Here the brave but youthfu chieftain Mondonka wood add won the levely princess of blatchaine. When the dew was on the grass, and the mist of morning held if a frowning cliff of Thilancok in its chill emirace, the lovers were wont to stroll forth in search of the delusive, but collisione c.am, and it is a matter of history that many a frephened blysics owed its life to a stolen kiss, spatched from the losits il'e to a stolen kiss spatched from the los

its life to a stolen kiss, snatched from the lea-cious lips of the lovely princess at the critical moment when the claim was making rapid tracks for its cyclone-cellar.

Now how changed the scene! The dusky maken and the noble red man no longer bend fondly over il e prospect hole of the sketheddling claim but in their slend we see the pale dude and he dannty duding in all heir glory. Where the noble red man eagerly sought the foolish crab the paleface now roams, pitchfor; in hand, scanning-the golden sands for the same animal. But enough of these ead thoughts Kind render, did you ever prospect for clams.

and did you ever feel the thrill of joy that springs into the human heart when claim tracks are as thick as filriations on a moonlight night? Did you ever kneel by the side of an expansion in the shifting rands and gaze seawand at the league-long rollers, while you probe cagarly with your hand for the object of your search? If so you can appreciate the thill of expects tion that urged me on in the mad pursuit of the best ful clam the morphing. You car under-sland why I can my aim into the soft sand up to the hill and toped carnetly with the fast subdog bivalve. You will know how the tan-tailing creature lured me on and on intil my ereballs were protruding from their socket only at the last moment to say, "To, ta, I thin I shall retire to the back partor?" And pe haps some of you can remember the agrilation that seved me when I found my arm securely held by the caving said, with the tide rolling rapidly in and not a person in sight. Oh, it was inter to think of dying there alone, and my board bill pair in advance that I should be compelled to field up my life when the a were se many others loading around the croquet grounds who, were better prepared than I to face the unknowable. one was betraying us

Early in the morning Mayne set forth Early in the morning mayne set 19-ma alone intending as I supposed to have another interview with Virginia Eandall I did not feel altogether at ease about this intimacy renewed at such a moment. Se bastian had evidently never ceased to ove her and it was dangerous for even a man like him to love so fair E. reb.! On the other hand, whether she leved him or not about was considered from the love to adwhere mand, whether she reved him or not she was enpable of name his love to ad vance her own ends. And women though they do not fight with sword or rifle can hind the means of helping their side of a strug, he which are sourcely ess effective. And certain indications which I had lately observed led me to think that mischief wis prewing, or was already a not not, far, off brewing or was already a cost not far off Meanwhile I could only watch for scine

was he had not the born soldier's lower for lattle for its own eake—had not even, per haps any really that interest in the gause for which he fought. He would have preferred that whatever right and truth there was on either side of the conflict should one developed and inculcated by other thems than the sword. In short—for I may sky ll state my to pressuon be it correct or job—I could not help funking that Sebastian like (urwin would never have entered the array had there been no such person as Virgilia.) Randall. The two men were almost at the opposite poles of manhood but their same woman swayed them both. She had done we mun swayed them both. Mayne had not filled his new position a week before the men were willing to follow, him unywhere, though his discip me was as strict as his popularity was hearty and he never excused conscious military dereliction. When men go out to high they don't much care to be fed by kinchess and mercy and by just ce and foresight and a strength greater than their own. ror several minutes there was almost total silence. The sun shone down troad and hot out of the blue sky upon the shining stream which glidded smoothly and sluggishly past. A couple of swallows skimmed and dipped of the surface. There was a funt undertone of humaning tracets. There was a fame undersome of the life insects Curwin crouched with his life ready cocked and poised; I strained my eyes to detect a movement or the gleam of a gun barrel upon the opposite bruk but no living thing betrayed its presence, there. The time seemed to pass with intoler the slowness. Mayne no doubt, was trying to revive kings drooping courage whether by words or by pungent, deco tions but it began to look us if neither were likely to avail much * * Hark' there, he goes at last trampting heavily through the underbrush and whistling as he goes I could just distinguish amutat the taff boughs the movement of his figure which seemed larger than ordinary. MADGE'S LETTER.

San Francisco, Aug 10. I suppose, as a private and insignificant indi-vidual, I am at liberty to say, without disrespect, that it is an infinite relief to feel that Gen-trantis decently furied at iast. The protracted suppense caused by the ted our nature of his ill-ness, the delay in his buria, the long-drawn-out-preparations for his homorable and magnificant intervent have around the consists of the interment have arranged the capacity of the American press to a palpable degree, and them-has been apparent in every newspaper of the inited states the monotony of continual repetition in the notices, remarks, anecdotes, scrap-

cisco for the decoration of public or privaça buildings in tribule to the dead hero, and there was a continual tanking up pulling down, alter-ing, increasing, d minishing the divers and sun-dry emblems of mourning up to the very hour when the procession began to move beneath

fused impression hat the entire city had been to rage and thing to the four winds of so heaven. Such a fluttering, flying, dancing, the waving, whirling, tattered expression the brush thoroughfare and resent, and beneath this beginning to the control of the con widering, restless canopy was crowded together a great mass of h imanity, pushing and scram bing for advantageous places, disputing the freedom of cobile and curb, warm, weary, dusty, impalient, but patriodic. The Chronick feelingly remarks that San

Francisco has no need to feel ashamed of the manner in which the funeral obsequies of the dead general were observed, reminds us rather sujerfluously that the remines were not here. and there was but a sentiment to call out the "But, goes on the Chromoto, "the sentiment was both a sentiment was both a deep and softening one that even the police remarked it in the case with which thry managed the crowd—the feeling that pervided the people was of the gentlest, and, in many cross most be districted character.

many cross, most self-denying character?

This phase of the public sentiment, I must confess, escaped me, and usither did I meet in my peregrinations toward my promised place in the Palace hotel any spirit of startling sofficial On the contrary, I was mashed, manifely

Amember of the surveying party now engiged in running the boundaries of the Silez Indian reservation sends he following notes. The party consists of J.D. I should not advise any of our Portland boys to go hunting in these movntains, as the timber is so dense and hills high and sleep that our surveying party cannot make more than one to two miles and sometimes two and half miles per day with hard work.

TACOMA, Aug 18

The Methodist conference in this city adjourn ed finally last night at 10 30. There were no important changes in appointments this year, all remaining as last year except at Tacoma. Her J A Want returns to fowa, from whence he came one year ago to fill this important station flow from the first product of the conference on the amount of its boneve and collections for the conference year. That beautiful suburb of Poythand has only to give proper attention to all its interests, church, and off erwise, to obtain preminent notice of the entire northwest.

The conference before adjournment appointed a board of tweath three trustees, to found, as soon as the case may require, a university for the conference. Vancouver is represented in the beard by I outs Sohns, S. D. Maxon, and F. M. Robertson. Objumpa, Tacoma, Seattle and Fort Townsend are also represented in the board of the conference within the board of the conference of the arrangement will be a fine school of learning somewhere within the boinds of the conference I Vancouver usants ampling in this line new is the time to speak.

ind would be cleared enough to seed to bed like.

Fens and clover have been tried sufficiently to fens and clover have been tried sufficiently to find their value here. Frough pirk and beef tourid the raised from them to double the wealth and population of Western Oregon. They would be the population of Western Oregon. They would not come in as sunificient to pure firm raising and without it grain farming, and without it grain farming, and without it grain farming is likely to the property of the complement of grain farming.

All that is needed is a movement on the part of Portland to take and dispose of what port is to test the country can produce. The farmers would had such a movement with entiumsam.

The following letter, written at Portland, has been published in the Wels.er (Hamilton county) Iowa Freenan:

The climate here is the best I ever saw the crops are splendid for weeks we have had no rain, hay and graff is about a I cut, with no rain on either, the fruit crop is large and of the finest varieties I ever saw, nature is doing all she can for this country. There are drawbacks, however, here as elsewhere. The great troul is here is to know what to do with the crups after raising them, that's the important question. You know as well all every farmer does that wheat ruising will in the long run net in loss to the grower. As long as they could get \$1 for wheat here its farmers were all ruish but 50 to 60 couls per bushel kills them. Now the wheat they must grow, as it and some cheap wood is all the farmer can sell to gay his Lils with Oate and barley are very uncertain a to sale, they can only be sold for each when they are wanted. Pork there is no sale for except to the butchere, and then only from to techer to Yarch—as there is not a packing house in the state. I have on my busher, each there, left in fast hogs that I and mapey the very uncertaint at a sale, they can only be sold for each when they are wanted Perk there is no sale for except to the butchers, and then only from totober to Narch—as there is not a packing house in the state. I have on my place, near hugene, fitty find at hogs that i cannot get an offer on—not even three cents per pound. There is no demand for hogs in the summer A good large packing bouse here would be an immense thing—it would pay bug. As it is, the city of Portland takes from two to four cars of bac in and hams weekly from the feat, third lays on the ground or rots on the tries, shousards of tons of a—because there is no market for it not a fruit cannery in Oregon to put it up and the tailstade put on a tailf that Prohibits shipping beyond the erritories. We have about 600 or 800 bushels of fine pountons—letter than you ever saw in Lamilton county, that I can't sell for anything, and yet not a starch factory in the state at twenty to twenty five cents they would pey well. Butter is solling here for twenty five cents a pound, not very good. In the country, it some place stainers only get how enty five cents a pound, not very good in the country, it some place stainers only get how enty five cents a pound, not very good in the country, it some place is much as all it at fifty cents a pound, not very good in the country, it is my place and only it is not a first only in the country. It some place is much a city, and this tatto is better than I was for creamers. Now, in my case, the data fines me with—say 2st hogs, fifty good care, quite fit for market if a cares of his period well at a fifty cents a pound. There is the fit is a first pound at the popular country at the site of popular to have places and on the risk of selling the hogs in writer. This is that it can't sell for cash the poply way I can do is as the "of settlered do—run in delt in different places and on the risk of selling the hogs in writer. This is the tweety house of the profit is a first pountry. Whe had a care of incountry wit
